

## Ayeeza Mehboob Khan

DevOps Engineer

Email: Ayeezakhan55@gmail.com

Phone: +92 329 4236137

I am an AWS DevOps Engineer with over **1+ years** of experience, specializing in optimizing cloud infrastructure for improved efficiency and security. I have hands-on experience with AWS Cloud, Terraform, Linux, Docker, Networking, Jenkins CI/CD pipelines. I also have experience with monitoring tools

## KEY SKILLS & SPECIALIZATIONS:

### DevOps & Cloud Automation Expertise:

With over a **1+ year** of **practical experience**, I specialize in designing and implementing reliable, automated DevOps solutions using tools like Linux, AWS, Docker, Grafana, Terraform, and CI/CD pipelines. I focus on streamlining infrastructure provisioning, deployment workflows, and monitoring across cloud environments such as Azure.

- **Cloud & DevOps Skills:** Hands-on experience with Amazon Web Services cloud services including EC2 (Virtual Machines), VPC (Networking), S3 (Storage), RDS (SQL Database), Elastic Beanstalk (App Services), Route 53 (Traffic Management), and Secrets Manager, combined with foundational Linux administration and NGINX web server configuration.
- **Infrastructure as Code (IaC):** Implemented Terraform and biceps scripts to provision and manage Azure resources, including EC2, S3, Secrets Manager etc.
- **CI/CD Pipeline(Jenkins):** Created Node.js application pipeline with build/test/deploy stages using Jenkinsfile and automated job triggers. Also used the Jenkins RBAC services to give the access to teammates.
- **Grafana Observability:** Implemented centralized logging and metrics dashboards using Loki, alloy, Promtail, Prometheus, and Grafana to visualize application logs, system metrics.
- **Linux:** Hand on experience with Linux file system, shell commands, user and groups permission management, firewall, public IP configuration, SSH configuration etc
- **Web Server (Nginx):** configuration for serving static websites, nodejs website with reverse proxy setup, DNS and virtual host management at production
- **Bash Scripting:** Developed automation scripts to install software (e.g., Nginx, Postfix), manage services, set up firewalls, schedule cron jobs, and simplify system administration tasks.

## PROFESSIONAL QUALIFICATION

UNIVERSITY OF PUNJAB, Lahore, Pakistan

Bachelor's Degree (2024 – 2028)

# Technical Skills

**Operating Systems:** Linux Administration

**Cloud Platforms:** Amazon Web Services (IAM, EC2, VPC, S3, RDS, Route 53)

**Infrastructure as Code (IaC):** Terraform

**CI/CD Automation:** Jenkins Pipelines

**Containerization:** Docker

**Web Servers:** NGINX Configuration & Management

**Monitoring & Logging:** Prometheus, Grafana , loki

**Networking:** TCP/IP, DNS, Load Balancing, Security Groups, VPC Configuration
